N7ZEV Mt Potosi (8514') - Input 2441.0 FM, 434.0 AM, output 912.0 FM, all vertical polarization

►NOTES◄

A) This list shows open, operational repeaters. However, the fact that a repeater is shown on this list does not necessarily mean that the repeater is indeed open, and the fact that a channel is shown as vacant does not mean that it is not assigned by the coordinators.
B) Changes should be called in to Amateur Electronic Supply. This list is updated on a continuing basis - your assistance in corrections and additions is appreciated.
C) The basic concept of this list is "Las Vegas and three hours each direction" - the fact that a repeater is shown on this list does not mean that the coverage extends into the Las Vegas Valley.
D) Planning on putting up a repeater? Southern Nevada Repeater Council coordination is available at http://www.snrc.us.
E) Clark Co. RACES/ARES membership applications at AES and http://www.ccnvares.org.

►CLUB ACTIVITIES◄
