

WELCOME

Thank you for choosing Vortex Optics®. We respect people like you—people who appreciate meticulously designed, precision engineered optics.

Vortex Optics® are built from the ground up to meet the exacting needs of precision-driven, tactical shooters. If you're looking for tactical optics, you'll find them in this half of the book. Flip to the other half, if you're looking for hunting optics.

We are here to answer any questions you may have and look forward to personally welcoming you to the Vortex Nation.

NOTE: The VIP Warranty does not cover loss, theft, deliberate damage or cosmetic damage that does not hinder the performance of the product.

RAZOR[®] HD GEN II

RIFLESCOPES

KEY FEATURES:

▶ **APO (ACHROMATIC)**
This objective lens system uses index-matched lenses to correct color across the entire visual spectrum.

▶ **HD (HIGH DENSITY)**
Premium extra-low dispersion glass delivers the ultimate in resolution and color fidelity, resulting in high-definition images.

▶ **XR PLUS™**
Fully multi-coated lenses deliver the highest level of light transmission for maximum brightness.

▶ **PLASMA TECH™**
Plasma Tech provides unparalleled coating durability and performance.

▶ **ARMORTEK®**
Protects the exterior lenses from scratches, oil, and dirt.

▶ **ARGON GAS**
Argon gas-purged and o-ring-sealed for fogproof and waterproof performance.

▶ **SHOCKPROOF**
Shockproof construction withstands recoil and impact.

▶ **FIRST AND SECOND FOCAL PLANE**
FFP reticles are located in the front of the erector tube near the windage and elevation turrets. The main advantage is all subtensions remain consistent at all magnifications.

SFP reticles are located within the eyepiece assembly. The main advantage is the reticle size remains consistent at all magnifications.

RAZOR[®] HD GEN II

RIFLESCOPES

4.5-27 X 56 AND 3-18 X 50 RIFLESCOPES

Razor[®] HD Gen II riflescopes are specifically designed with the tactical, law enforcement, and precision shooting communities in mind and offer the highest levels of performance and reliability. Choose the 4.5-27 x 56 or the 3-18 x 50 configuration to suit your application. Loaded with state-of-the-art performance features, these deadly accurate scopes boast our APO index-matched objective lenses, HD extra-low dispersion glass, a 6x zoom range, a 34mm one-piece aircraft-grade aluminum tube, and our sophisticated L-Tec[™] Turret System. If you're looking for the pinnacle of performance and reliability, you just found your new scope.

1-6 X 24 RIFLESCOPES

Designed specifically for the AR platform, the Razor[®] HD Gen II 1-6 x 24 features HD lens elements, an APO objective lens system, and our proprietary XR Plus[™] anti-reflective coatings to deliver the highest level of clarity, resolution, color accuracy, light transmission, and edge-to-edge sharpness obtainable. Pair this performance with its generous eye relief and ultra-forgiving eyepiece for fast target acquisition and you begin to see why it consistently earns 5-star customer ratings.

RAZOR HD

RIFLESCOPES

RIFLESCOPES 8 Razor® HD

KEY FEATURES:

▶ **HD (High Density)**
Premium extra-low dispersion glass delivers the ultimate in resolution and color fidelity, resulting in high-definition images.

▶ **XR™**
Fully multi-coated lenses deliver the highest level of light transmission for maximum brightness.

▶ **ARMORTEK®**
Protects the exterior lenses from scratches, oil, and dirt.

▶ **ARGON GAS**
Argon gas-purged and o-ring-sealed for fogproof and waterproof performance.

▶ **SHOCKPROOF**
Shockproof construction withstands recoil and impact.

▶ **FIRST FOCAL PLANE**
FFP reticles are located in the front of the erector tube near the windage and elevation turrets. The main advantage is all subtensions remain consistent at all magnifications.

▶ **OFFSET ILLUMINATION CONTROL**
The illuminated reticle control knob is set at a 45° angle for easy adjustments without blocking your view of the turrets, magnification setting, or parallax adjustment. There is an off position between each intensity level so you can turn it on or off with just a single click.

▶ **RZR™ ZERO STOP**
Rapid Zero Return (RZR) feature stops the turret from dialing below sight-in range using rugged steel components. Internal mechanisms stay free of sand, dirt, dust, moisture and other foreign materials—even when setting the zero-stop position.

RIFLESCOPES 9 Razor® HD

RAZOR® HD

RIFLESCOPES

Designed and built to meet the specific demands of discriminating shooters, the Razor® HD delivers on all levels. Built on a 35mm tube, it's packed with more than a dozen unique performance and optical features, including Vortex's proprietary hash-marked MOA and MRAD reticles. Simply put, the Razor HD allows marksmen to make precision shots and tight groups at various ranges by simply calculating and dialing in.

OFFSET ILLUMINATION CONTROL

The control knob for the illuminated reticle is offset at a 45° angle to allow easy adjustments without blocking the view of the turrets, magnification setting, or parallax adjustment. The control also features an off position between each intensity level so the illumination can be turned on or off with a single click.

MAGVIEW™ SYSTEM

A fiber-optic magnification indicator, combined with raised, rear-facing magnification references on the zoom dial, provides fast visual confirmation of magnification from the shooting position in low-light conditions.

RZR™ ZERO STOP MECHANISM

Vortex's patented RZR™ (Rapid Zero Return) Zero Stop mechanism prevents the turret from dialing below sight-in range for fast, precise return to zero after temporary elevation correction. Once set during sight-in, the turret can be quickly spun and stopped at the zero setting without counting clicks. The patented rotational blocking steel mechanism ensures ultimate reliability.

INCREDIBLE FEATURES – INCREDIBLE WARRANTY

After many months of research and many opportunities to use competitors' products, I found myself coming back to the Razor HD. If you're in the market for a high-end optic, compare price, warranty and features (EBR reticle, Zero stop, first focal plane) and then get behind the glass! My rifle is quickly becoming a favorite at the range and everyone loves the Razor HD.

Customizable Rotational Stop (CRS) aids in return to zero after dialing temporary elevation correction.

▶ **MAG-VIEW[™] FIBER OPTIC**
Provides a highly visible reference point for the magnification setting.

VIPER® PST™

PRECISION SHOOTING/TACTICAL RIFLESCOPES

This high-quality tactical scope sports the bells and whistles of our Razor® HD and other “Alpha” class scopes at half the price. Viper® PST™ riflescopes feature durable 30mm tubes, and come equipped with tall tactical turrets, customizable zero stop, illuminated reticles, and perhaps most importantly, high quality extra-low dispersion glass for superb images. A range of different configurations with multiple reticles makes the Viper PST series a perfect choice for tactical and long-range shooters.

BUILT-IN ACCURACY FEATURES
Matching (MRAD or MOA) turrets and reticles facilitate fast and accurate shooting at extended ranges. Unique, stackable shims provide a zero-stop under the elevation turret, and the patented fiber optic Radius Bar visually assists tracking turret rotations. US Patent 7,937,879

EXTREME CLARITY!

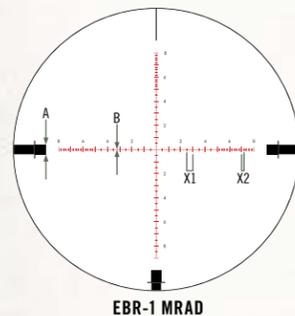

There is only one optic that delivers what they promise. Who, you may ask? Vortex Optics. The Viper PST has a phenomenal level of picture clarity and light intake. I have purchased other high dollar and name brand optics but I can honestly say there hasn't been one that impressed me as much as this. I absolutely hate looking through an optic if there is a slight hazy appearance, even if it is miniscule. The Viper PST provided durability, clarity and reliability. Quality is what Americans ask for and Vortex Optics delivers. I highly recommend this product. —javier13, Texas

VIPER[®] HST[™]

HUNTING/SHOOTING/TACTICAL RIFLESCOPES

Versatile, precise, and rugged—the three words that describe the Viper[®] HST[™]. Blending many of the best features from our incredibly popular Viper[®] PST[™] and Viper HS[™] riflescopes, the Viper HST is built on a 30mm, one-piece machined aluminum tube to deliver increased windage and elevation travel for optimal adjustment. The advanced optical system with 4x zoom range provides magnification versatility. A forgiving eye box with 4-inch eye relief gets shooters on target quickly and easily. Its long-range performance features include a hash-marked reticle and incredibly precise, repeatable, and durable tactical windage and elevation turrets built specifically for dialing. From tree stands to mountain tops, bolt guns to ARs, the Viper HST is ideal for a wide range of shooting applications.

EXPOSED TACTICAL-STYLE TURRETS

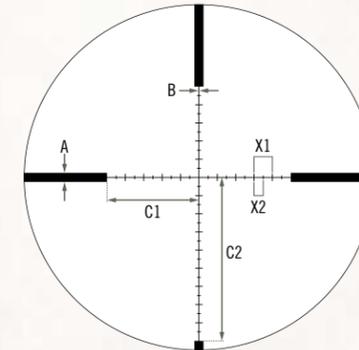

The Viper[®] HST features incredibly precise, repeatable and durable tactical windage and elevation turrets. CRS (Customizable Rotational Stop) system allows you to quickly re-index the turret after making temporary elevation corrections.

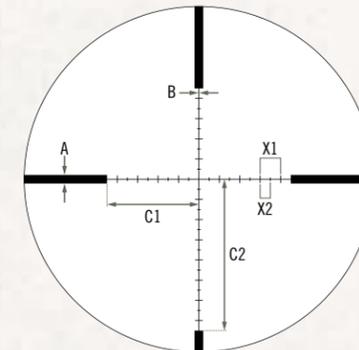

ATTENTION TO DETAIL MAKES A DIFFERENCE

The name says it all for me HST Hunting, Shooting, Tactical. I purchased this scope in April 2014 to put on a bolt gun for a Big Game hunt this fall. After handling other optics at my local hunting store it was clear this scope was made for my lifestyle. Advanced details won me over like premium lenses, CRS, and the fiber optic bars. Operating the HST on a long range course has made me a confident shooter. —Warmachine, Ohio

KRYPTEK HIGHLANDER MESH CAP MSRP US \$20.00

It's one of the most bizarre phenomena in nature—the relationship between blaze orange and camo. Theoretically speaking, these two should be a freshly-brushed-teeth-immediately-followed-by-a-tall-glass-of-orange-juice-type combination. But then you put blaze orange on a hat with Kryptek camo and you realize these two were made for each other.

STRIKE EAGLE

RIFLESCOPE

RIFLESCOPES 20 Strike Eagle®

KEY FEATURES:

▶ **FULLY MULTI-COATED**
Anti-reflective lens coatings on every lens surface allows for brighter views.

▶ **NITROGEN GAS**
Nitrogen gas-purging with o-ring-seals delivers fogproof and waterproof performance.

▶ **SHOCKPROOF**
Shockproof construction withstands recoil and impact.

▶ **SECOND FOCAL PLANE**
SFP reticles will not change in size as the magnification changes. The reticle maintains the same appearance at all magnifications.

▶ **EXTRA BATTERY STORAGE**
An extra battery stores in the windage cap for easy access and for quick change.

RIFLESCOPES 21 Strike Eagle®

STRIKE EAGLE®

RIFLESCOPE

Speed and versatility—that's what 1x variable optics offer AR shooters who need to engage targets from point-blank out to extended ranges. That's exactly what you'll get with Vortex's Strike Eagle® 1-6 x 24. Take into consideration what it costs to get into this optic, and you may find you can't afford not to buy it.

Whether you're burning through a 3-Gun Stage, logging some range time, or holding for hair on a coyote you've duped into thinking you're lunch, the Strike Eagle® is up to the task. High-quality, fully multi-coated lenses deliver a clear, crisp sight picture and optimal low-light performance. A true one-power on the low end of its 6x zoom range provides quick target acquisition in close quarters scenarios. Need to engage targets at distance? Crank it up to 6x and let it rip.

ILLUMINATION DIAL

The illumination dial, located on the left side of the turret housing, features eleven intensity levels to accommodate varying light conditions. CR 2032 Battery.

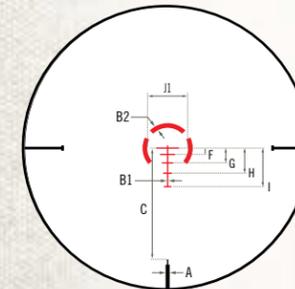

MAGNIFICATION RIB

The raised rib on the magnification ring facilitates fast magnification changes in the heat of action.

BY FAR BEST AR SCOPE FOR THE MONEY

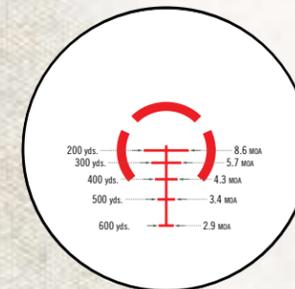

It took me a while to get my hands on one after reading about them but once I did I couldn't have been happier. I always wanted a compact AR and when the Strike Eagle came out, I told myself I was going to build a new lightweight gun and go all out on it. I finished building it and it sat in my safe for a couple months but now it is truly perfect. The eye relief is outstanding, the glass is clear as always, lightweight, I could go on and on. There is a reason why I switched all my optics to Vortex and it's the same reason why they will stay Vortex. —Boldfieldb, South Dakota

RETICLES:

AR-BDC SUBTENSIONS

The illuminated, glass-etched BDC reticle subtends with popular 5.56mm cartridges, and the centered halo promotes fast target acquisition.

AR-BDC

The drop hash-marks are designed to work with the rifle scope set at the highest magnification. The main crosshair can always be used at any magnification, and zero ranges will not change.

NOTE: Reticle images shown for representation only. Reticle image varies between scope models depending on magnification and reticle plane. The letters on the reticle images refer to the subtensions in the chart.

SPITFIRE®

PRISM SCOPE

When you need fast target acquisition in close to medium-range shooting scenarios, the Spitfire® 3x excels. Built for AR platform rifles, it combines an impressive array of high-performance features into a rugged, ultra-compact package. The sophisticated, prism-based design allows for a more compact optical system without sacrificing a shred of optical quality. A single touch gives the choice between a red or green illuminated reticle and five intensity levels. The reticle is etched directly onto the prism to assure you have point-of-aim at all times—even when the illumination is not engaged.

VIPER[®] HD R/T & R/T

FULL SIZE/COMPACT ROOF PRISM BINOCULARS

The Viper[®] HD R/T and the Viper[®] R/T tactical binoculars combine award-winning optics and tactical features to create a tough, durable roof prism binocular—reliable in the worst conditions.

Choose the 10 x 50 with HD extra-low dispersion glass objective lenses to further enhance resolution and deliver the true-to-life color accuracy required for identifying targets at long distances in low light.

The R/T ranging reticle features four silhouettes that serve as secondary ranging aids, so you can easily range objects of known dimensions.

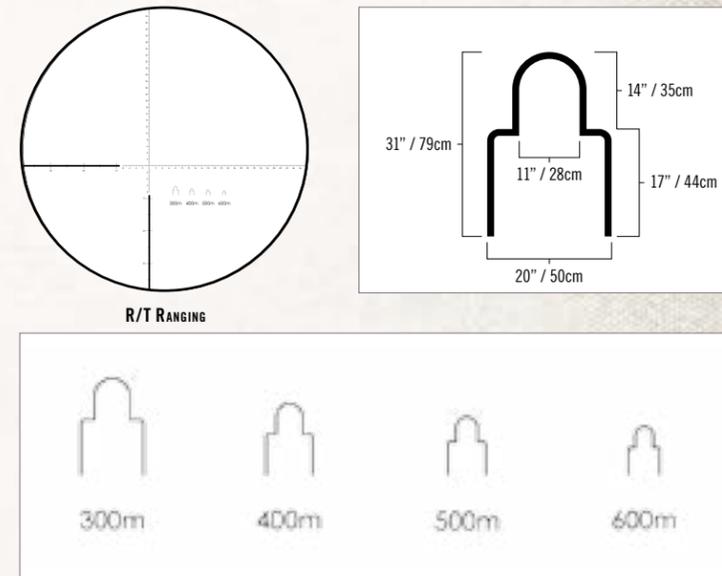

The durable rubber armor provides a secure, non-slip grip, and winged eyecups rotate for a custom fit that shields distracting ambient light.

R/T RANGING RETICLE

The R/T ranging reticle uses MRAD-based subtensions. These angular measurements allow a user to calculate ranges when comparing the reticle to objects of known dimension. Also includes silhouettes for quick ranging.

HURRICANE[®]

FULL SIZE PORRO PRISM BINOCULARS

This Argon gas-purged, o-ring-sealed, weatherproof bino won't let a stormy, windy, nasty day get you down. It's built to be 100 percent waterproof, shockproof, fogproof, and dustproof. Fully multi-coated lens surfaces ensure bright images, even in inclement weather. The time-tested Porro prism design and individually focused eyepieces add to its allure. Let it snow, rain, and sleet—you'll be ready.

PORRO PRISM DESIGN:

- Valued for a rich depth of field, wide field of view, and three-dimensional image.
- Inherent to its Porro prism design and quality components, the Hurricane delivers incredibly sound optical quality with maximum light transmission.
- The individual eyepiece focusing ensures eyepieces are tuned specifically to each eye for ultra-sharp, customized views.
- The stable ergonomic housing provides optimal performance every time you lift them to your eyes.

PORRO PRISM PERFECTION!!

When I was a kid I had some Porro prism binos and when I saw these I had to give them a try. These Vortex Hurricane 7x50 binos are nothing short of spectacular! They do have a 3D image which is crystal clear and very bright. Easy to set for your eyes and ready to go anytime as they are always focused. Extremely well made, solid build. The body shape fits like a glove to your hands. The 7x50 is perfect for this size binocular. As good or better than \$2,000 binos I have looked through. Just an amazing pair of binos for this price. Could easily last a lifetime and then some.

BEST KEPT SECRET!

I stumbled onto the Recon R/T just by chance. Monoculars are really not my thing, however when I saw this little guy had a MRAD reticle, I had to look into it further. Quick, on the go, and light. The reticle is spot-on and it even has silhouettes from 300 to 600 meters. The optics surprised me and are beyond my expectation for such a small package—crisp and crystal clear. I am still overwhelmed with everything that came with it. Vortex really stepped up to the plate on this optic. Beyond perfect for the field or deployment overseas. Even my 10-year-old son can quickly range for me now! —Scarzone, Arizona

SOLO® R/T

MONOCULAR

Built to be carried as a standard piece of equipment and be close at hand, the Solo® R/T Tactical monocular gives a closer look when needed. It features the Vortex R/T Ranging reticle with reticle focus for accurate range estimation and calling shots. The generous eye relief and a large exit pupil deliver optical performance normally reserved for binoculars, and the premium roof prisms and fully multi-coated optics deliver a bright, clear view. Completely waterproof and nitrogen gas-purged, the Solo R/T features textured rubber armor and a convenient belt or webbing strap clip.

EXCELLENT OPTIC!

This is an excellent monocular for the cost, add in the range-finding reticle and you have an outstanding product. Clear glass, excellent rubber housing, and fits the hand perfectly. I'm just getting into MRAD with my scopes, and this helps me practice in the off-season with range finding. The optics reticle also helps when looking at an animal someone has difficulty spotting and saves the troubles of describing where it is. 'Reference third tree to the left, three notches to the right and one notch down is the deer.' —Patty, Canada
