## **New Feature: HTML5 Access Sessions**

\*This feature is for those who are/were currently using the Telnet/SSH session feature on the non-standard Pulse Secure connection. Web page access here: <u>https://vpn.l3harris.com/non-standard</u>

\*Please note: the Terminal Sessions will remain the same. No changes were made or are needed here.

\*If you have any saved Telnet/SSH sessions, please be sure to save this information locally to your computer **prior to the Upgrade date June 23, 2023** and follow the below steps to add them into your HTML5 session section.

- 1. Sign into vpn.l3harris.com via a Personal or non L3Harris device
- 2. From the VPN web bookmarks landing page, click on the icon with + icon under HTML5 Access Sessions section:

|   | ns 📔 🗧 🚰  |
|---|---|
|   | Launch Remote Desktop Session to Hostname or IP (eg: test.device.net or   |
| 192.168.2.3)  |   |
| You don't hav   | re any HTML5 Access sessions.   |
|   |   |
|   | tions as required/needed:   |
| <mark>ggested tip:</mark> Cho   | oose the Display option for "Open bookmark in a new window"   |
